## **Glossary of Terms**

#### **National Animal Identification System (NAIS)**

A national program intended to identify all agricultural animals and track them as they come into contact with, or are intermixed with, animals other than herdmates from their premises of origin

#### **Premises**

Any geographically unique location in which agricultural animals are raised, held, or boarded examples: farms, ranches, feedyards, auction barns, livestock exhibitions and fair sites

#### **Premises Identification Number**

A unique 7-character alphanumeric identification for each registered premises or group of premises registered as one due to animals being managed together on the multiple premises

#### **Primary (Main) Premises**

Premises considered headquarters if multiple farms/premises are used in operation

#### Landowner

Current owner of property with all the legal rights and responsibilities thereof

#### **Primary Contact**

Person with responsibility of the animals' health and whom the animal health official is to communicate with when performing a traceback

#### Business name / Farm name

Name of business operating the farm or name of farm consisting of primary premises

#### **Secondary Contact**

Person who could be contacted regarding animals if primary contact could not be reached

#### **Account/Farm Mailing Address**

Address where correspondence will be mailed for premises, P.O. Box and Rural Route are acceptable

#### **Main Premises Physical Address/Location**

Physical address of primary premises which can be validated by U.S. Postal Service or E911 databases

#### **Premises Description**

Name/term used to describe premises location examples: Main farm, Jones Farm, West Operation

#### **Premises Type**

Type of operation on premises at time of registration

#### **Producer Unit/Farm**

Farm, ranch, backgrounding facility, feedlot, boarding facility, etc.

#### Clinic

Location where animals are treated for disease or injury

#### **Exhibition**

Animal show or exhibition - County and State Fairs, National Show, etc.

## Glossary of Terms continued

#### Laboratory

Location where animals are terminated and carcasses examined

#### **Market/Collection Point**

Livestock market/auction or collection point where animals are bought and sold

#### **Non-producer Participant**

Organization that records animal information and has no association with the animals examples: DHIA, Veterinarian, etc.

#### **Port of Entry**

Location where animals are allowed to enter into the U.S.

#### **Quarantine Facility**

Location where diseased animals are quarantined

#### Rendering

Location where animals that died at the farm or in transit are processed

#### **Slaughter Plant**

Location where animals are terminated for consumption

#### **Tagging Site**

Location where animals are tagged with an official USDA approved ID device

#### **Species Type**

Types of agricultural animals on premises at time of registration

## **Frequently Asked Questions**

#### What is the National Animal Identification System (NAIS)?

The NAIS is a system of identifying all premises and animals involved in animal agriculture production and tracking them through the production chain for disease trackback ability. The goal of the NAIS is to have the capability to identify all animals and premises that had direct contact with a foreign animal disease within 48 hours of discovery.

#### How much does it cost to have my premises registered?

At this time, there is no cost for registering a premises through the state system

#### Can I register my premises online?

At this time, online registration is not available for producers to register their own premises; however, this may be an option in the future. The registration form is currently available for download at the state's premises identification site http://state.tn.us/agriculture/tpis

#### What animals are considered to be livestock for this program?

Cattle, bison, swine, sheep, goats, poultry, equine, deer, elk, llama, emu

#### Is this a mandatory program?

The NAIS is a voluntary program being implemented by USDA with input from states and industry led working groups.

## Frequently Asked Questions continued

#### How do I register a premises that does not have a physical address?

Your local Farm Service Agency (FSA) office can assist you in completing the additional forms which are required in registering a premises which does not have a physical address. When completing the form you will need driving directions to the premises from a main intersection. When providing the driving directions, use directional indicators (East, West, South, and North), give number of miles from turns, and indicate on which side of road premises is located. You will also need the GPS coordinates for the premises in decimal degrees format. FSA can assist in obtaining these coordinates.

#### What if I lease a farm?

If you lease a premises and want to register it, you will need the permission of the landowner to do so. Verbal permission is sufficient.

#### Do I need multiple premises identification numbers if I operate on more than one premises?

If you have animals on multiple premises and all or part of the animals are moved between the premises, such as holding the bulls on one premises until they are moved to another premises for the breeding season, you can register all the premises under one premises identification number. Use the physical address for the main premises when registering.

# Do I have to register a premises separately if it is located in a different county than my main premises?

You do not have to register a premises under a different premises identification number if it is in another county from your main premises. When completing the form, if available, list the Farm Service Agency farm numbers for each premises and indicate in which county they are located.

#### Will the information I share about my premises and animals be kept confidential?

Under Tennessee law, information gathered for Homeland Security purposes, such as for NAIS, is to be kept confidential. Federal legislation is being developed to further ensure information gathered for NAIS will be kept confidential.

#### Will other government agencies such as the IRS be able to access the data I provide?

The information provided for the NAIS, including data about your premises, will only be used for disease tracking purposes and will not be available to other government agencies for use.

#### Will this system increase my liability?

If animals are managed according to generally accepted management practices, such as following Beef Quality Assurance guidelines, and all health/management products are given according to label instructions and documented, liability should be zero.

#### Does this system require me to individually identify or tag my animals?

No, you do not have to individually identify or tag your animals at this time. If the system becomes mandatory, animals will have to be identified when they enter commerce, that is, when they leave the herd of origin.

#### What type of tag will be used for identifying my animals?

Cattle will likely be identified using a radio frequency tag while other animals such as goats, sheep, and horses will likely be identified using a radio frequency implant. Both the tag and implant include only a 15-digit identification number for that animal. The tags and implants will not include the premises identification number for the animal's premises of origin.
